2	Summary			
<b>2-1) Title</b>				
Type title of your research here.				
<b>2-2) Key words</b>				
<i>First keyword, second keyword, third key word, ..., up to seven keywords</i>				
<b>2-3) Type of Research</b>				
<input type="checkbox"/> Basic <input type="checkbox"/> Applied <input type="checkbox"/> Problem specific <input type="checkbox"/> Qualitative				

### **3 Research Summary**

#### **3-1) Research Summary (Introduction, Statement of Problem and Importance)**

##### **3-1-1) Introduction**

Here, a brief introduction to the problem is written, focusing on the history of the problem. It should be between 1 to 5 pages.

##### **3-1-2) Statement of the Problem (SoP)**

Based on the previous part, here the research problem is explained in clear, complete, and robust way. References should be used to make the argument more reliable and clearly understood.

##### **3-1-2-1) sub-sub title**

In case, you need more space to categorize your description of the problem, you may use detailed numbering with a title to go through the problem.

##### **3-1-4) Research Problem**

#### **3-2) Literature Review**

Here you can write a concise literature review covering all the research related to your research problem. You are advised to use a table representing a brief

#### **3-3) Purpose of the Research**

The purpose of the study should be explained here. Answering questions like, why? How important? What if? ... may help the student to write a good PoR. Be generous and devote ample space to write these down.

#### **3-4) Research Methodology**

Here, the research methodology should be explained in details. This part, may consist of several subsections, depending on the topic and the department policy.

#### **3-5) Research Questions or Hypothesis**

This research seeks to answer the following questions:

- How can I improve the patient's flow in the emergency department?
- How can the objectives be: to reduce the patient's expectations, to reduce the amount of carbon dioxide produced by the use of electrical equipment in the patient's flow process?
- How can better improve the patient's flow in the emergency department?
